SDF-1H双层百叶风口 SDF-1H DOUBLE LOUVER AIR OUTLET >>

SDF-1V双层百叶风口 SDF-1V DOUBLE LOUVER AIR OUTLET >>

■ **材质:** 铝合金型材

■ **特性:**

- 风口叶片在 0° ~ 180° 范围内任意调节, 将叶片 调节成不同角度, 得到不同的送风距离和不同的扩散角。
- 可作回风口使用。

■ **规格尺寸:** (W x H) 尺寸可依据设计制造

■ **Material:** Aluminum alloy sections

■ **Features:**

- The leaf can be adjusted in any direction between 0° - 180° . With the adjustment of different angle of the leaf, you can have different reach distance and diffusion angle.
- It can also be used as air return outlet.

■ **Specification:** (W x H) size can be manufactured according to the design.

■ **表面处理:** 静电喷塑、烤漆或阳极处理

■ **可加附件:** SDA-1人字调节阀

- ※外框边宽尺寸E有三种: 16mm、23mm、32mm
- 当E=16时、h=42、面尺寸=颈尺寸+27
- 当E=23时、h=40、面尺寸=颈尺寸+37
- 当E=32时、h=50、面尺寸=颈尺寸+54

■ **Surface treatment:** Electrostatic spray, painting or anode treatment.

■ **Addible accessories:** SDA-1 air volume control switch

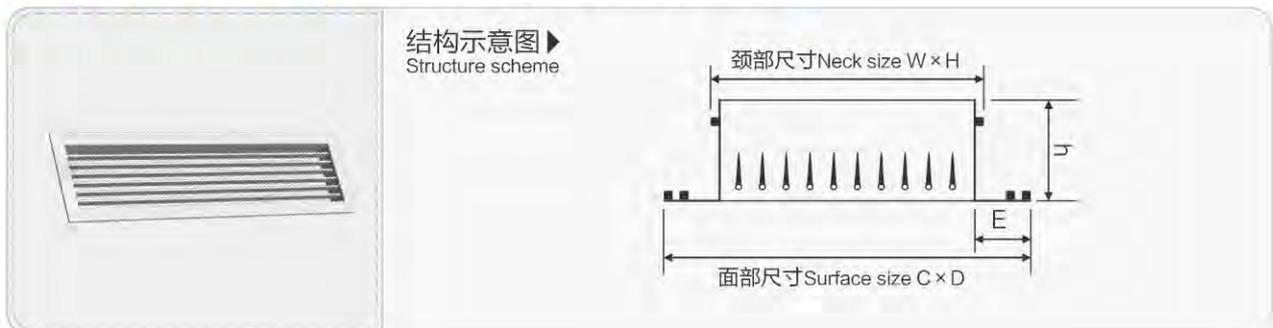

- ※There's three sizes for E of the outer frame: 16mm, 23mm, 32mm

When E=16, h=42, surface size = neck size +27

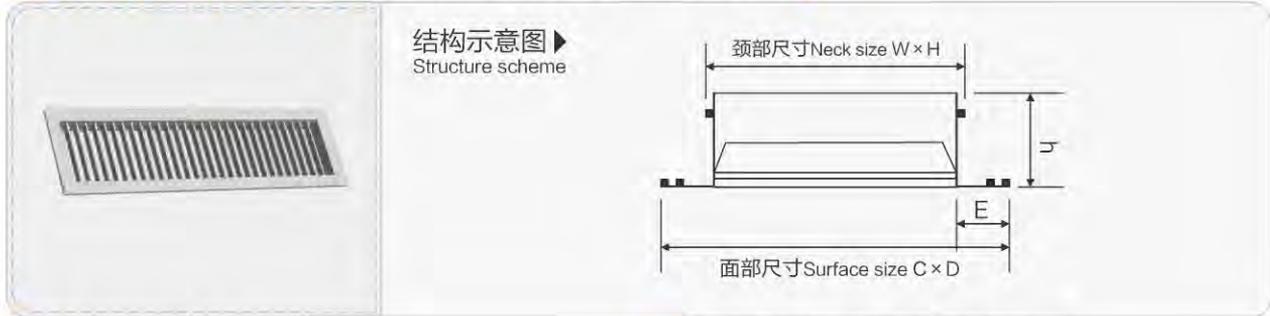

When E=23, h=40, surface size = neck size +37

When E=32, h=50, surface size = neck size +54

SDF-2H单层百叶风口 SDF-2H SINGLE LOUVER AIR OUTLET >>

SDF-2V单层百叶风口 SDF-2V SINGLE LOUVER AIR OUTLET >>

■ **材质:** 铝合金型材

■ **特性:**

- 风口叶片在 0° ~ 180° 范围内任意调节, 将叶片调节成不同角度, 可以得到不同的送风距离和不同的扩散角。
- 可作回风口使用。

■ **规格尺寸:** (W x H) 尺寸可依据设计制造

■ **Material:** Aluminum alloy sections

■ **Features:**

- The leaf can be adjusted in any direction between 0° - 180° . With the adjustment of different angle of the leaf, you can have different reach distance and diffusion angle.
- It can also be used as air return outlet.

■ **Specification:** (W x H) size can be manufactured according to the design.

■ **表面处理:** 静电喷塑、烤漆或阳极处理

■ **可加附件:** SDA-1人字调节阀

※外框边宽尺寸E有三种: 16mm、23mm、32mm

当E=16时、h=42、面尺寸=颈尺寸+27

当E=23时、h=40、面尺寸=颈尺寸+37

当E=32时、h=50、面尺寸=颈尺寸+54

■ **Surface treatment:** Electrostatic spray, painting or anode treatment.

■ **Addible accessories:** SDA-1 air volume control switch

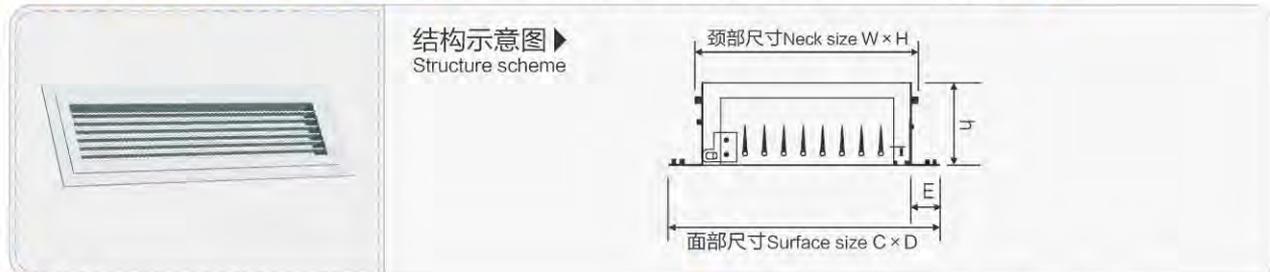

※There's three sizes for E of the outer frame: 16mm, 23mm, 32mm

When E=16, h=42, surface size = neck size +27

When E=23, h=40, surface size = neck size +37

When E=32, h=50, surface size = neck size +54

SDF-2K单层可开式百叶风口 SDF-2K SINGLE LAYER OPEN LOUVER AIR OUTLET >>

■ **材质:** 铝合金型材

■ **特性:**

- SDF-2K单层可开式百叶风口是在SDF-2单层百叶风口的基础上增加了一个内边框, 整个风口呈活门型式, 有利于安装和过滤网的配套使用, 常用于客房、大厅的回风。
- 用手轻拨活门上两边门栓, 活门即可打开、抽出过滤网洗清, 关闭时, 只要将活门推上, 两边弹簧门栓即可自动上锁, 外表平整如一。

■ **Material:** Aluminum alloy sections

■ **Features:**

- SDF-2K single layer open louver air outlet has increased an internal frame based on SDF-2 single louver air outlet. The whole air outlet is of valve type, which is easy to install and equip with filter. It is widely used for air return in guest rooms and lobbies of the hotel.
- The valve can be opened easily when you move the bolt on both sides and then take the filter out and clean it. The spring bolt on both sides can be locked automatically if you push the valve. The outer surface looks very even.

■ **规格尺寸:** (W x H) 尺寸可依据设计制造

■ **表面处理:** 静电喷塑、烤漆或阳极处理

■ **可加附件:** SDA-4尼龙过滤网、SDA-5铝合金过滤网

※外框边宽尺寸E有三种: 16mm、23mm、32mm

当E=16时、h=42、面尺寸=颈尺寸+27

当E=23时、h=40、面尺寸=颈尺寸+37

当E=32时、h=50、面尺寸=颈尺寸+54

■ **Specification:** (W x H) size can be manufactured according to the design.

■ **Surface treatment:** Electrostatic spray, painting or anode treatment.

■ **Addible accessories:** SDA-4 nylon filter, SDA-5 aluminum alloy filter

※There's three sizes for E of the outer frame: 16mm, 23mm, 32mm

When E=16, h=42, surface size = neck size +27

When E=23, h=40, surface size = neck size +37

When E=32, h=50, surface size = neck size +54

■ Vcm/s表示中心风速
■ Vcm/s means center
wind speed

■ 吹出角度在后数页中有说明
■ Angle of air blowing will be
explained in later pages

■ NC值栏[-]表示NC在20以下
■ [-] means NC value is below 20

单双层百叶出风口选用要领 How to choose single and double louver air outlet ▶

- 先决定吹出角度，然后对应其角度查性能表，将吹出之角度分A、B、C、D四种。A及B角度宜用于吹出空气所到达之距离双较长、扩散范围较狭小之场合。C及D角度宜用于吹出空气所到达之距离双较短，扩散范围较宽之场合。
- 中心风速的大小选定使用场合。
其条件包括风量，到达距离。
 - 风管断面面积(m^2)决定后，可由性能表中依标准尺寸较接近的加以决定。
 - 到达距离的值是末端风速0.25-0.5M/S测定然后由性能表中的吹出角度A~D、选定近似的吹出角度。再配合所需的风量而选取定。
- 吹出角度的气流分
- 下图中扩散宽度以6M为基准时，各吹出角度的到达距离。
空气下降度
 - 百叶风口所吹出的空气，由于吹出后气流扩大与通过吹处口的空气温度和室内温度间之差异，会使吹出之气流有自然下沉之现象，因此在设计上，必须列为考虑的因素，不然往往因空气分布作用点之不良，而导致相反之效果。
- First, decide the angle of air blowing. You can check the functional sheet. In order to easy to check, our company divide the angle of air blowing into 4 types, A, B, C and D. A and B is fit for such places that the reach distance is longer and diffusion scope is narrower. While C and D is fit for such places that the reach distance is shorter and diffusion scope is wider.
- Center wind speed decides the places including air volume and reach distance.
 - When the basal area of air pipe is decided, we can make our decision according to the size which is closer to the standard size in the parameter sheet.
 - Test if the air residual velocity is between 0.25- 0.5MS, then check the angle of air blowing A, B, C and D. Choose the similar angle and related air volume, then decide the value of reach distance.
- Flow distribution of the angle for air blowing
For the flowing charts, when the diffusion width is 6M, the reach distance of all air blowing angle.
- Air depression
 - As the air flow blown from the grille outlet will be expanded and cause temperature difference between room temperature and outlet temperature, which will lead to air blown from the outlet sinking. Therefore, we have to take it into consideration. Otherwise, it will cause reverse effect because of bad air distribution.

SDF-3 一面吹小百叶风口 SDF-3 SLICED LEAF ONE SIDE DIFFUSER ▶▶

结构示意图
Structure scheme

■ 材质：铝合金型材

■ 特性：

- SDF-3一面吹小百叶风口突出了线型设计特点，可用于室内和大厅环形分布的出风口和回风口，亦可安装在侧墙或天花板上。
- SDF-3叶片为固定式，斜式送风回风型式，叶片倾斜24度。

■ Material: Aluminum alloy sections

■ Features:

- SDF-3 sliced leaf one side diffuser has the outstanding features of linear design, which is used for circular distributed air outlet and return in the hall.
- The leaf of SDF-3 type is fixed and can be tilted for 24 degrees.

■ 表面处理：静电喷塑、烤漆或阳极处理

■ 可加附件：SDA-1人字调节阀、SDA-4尼龙过滤网

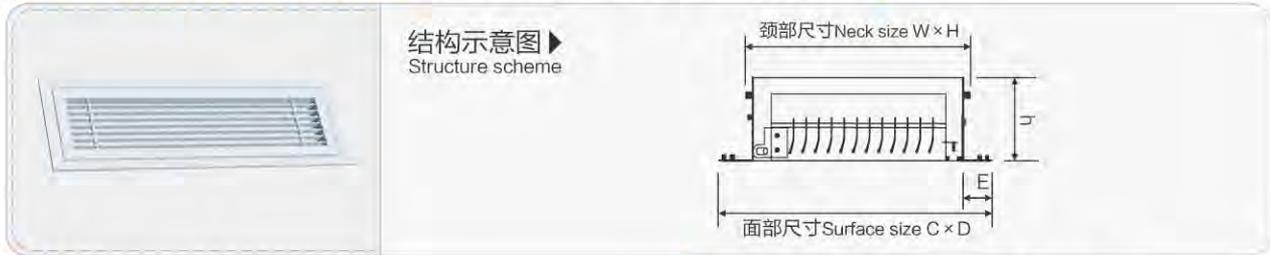

- ※外框边宽尺寸E有三种：16mm、23mm、32mm
- 当E=16时、h=42、面尺寸=颈尺寸+27
- 当E=23时、h=40、面尺寸=颈尺寸+37
- 当E=32时、h=50、面尺寸=颈尺寸+54
- ※最大长度为3米，超过时，可以把两节或多节拼起来使用。

■ Surface treatment: Electrostatic spray, painting

■ Addible accessories: SDF-1 air volume control switch, SDA-4 nylon filter

- ※ There's three sizes for E of the outer frame: 16mm, 23mm, 32mm
- When E=16, h=42, surface size = neck size +27
- When E=23, h=40, surface size = neck size +37
- When E=32, h=50, surface size = neck size +54
- ※ The longest length is 3 meters, if it is over 3 meters, you can combine 2 or 3 parts together.

SDF-3K可开式小百叶风口 SDF-3K SLICED LEAF OPEN DIFFUSER >>

■ **材质:** 铝合金型材

■ **特性:**

- SDF-3K可开式百叶回风口是在SDF-3一面吹小百叶风口的基础上增加了一个内边框，整个风口呈活门型式，有利于安装和过滤网的配套使用，常用于客房、大厅的回风。
- 用手轻拨活门上两边门栓，活门即可打开、抽出过滤网洗清，关闭时，只要将活门推上，两边弹簧门栓即可自动上锁，外表平整如一。

■ **Material:** Aluminum alloy sections

■ **Features:**

- SDF-3K sliced leaf open outlet has increased an internal frame based on SDF-3 sliced leaf one side diffuser. The whole air outlet is of valve type, which is easy to install and equip with filter. It is widely used for air return in guest rooms and lobbies of the hotel.
- The valve can be opened easily when you move the bolt on both sides and then take the filter out and clean it. The spring bolt on both sides can be locked automatically if you push the valve. The outer surface looks very even.

■ **规格尺寸:** (W × H) 尺寸可依据设计制造

■ **表面处理:** 静电喷塑、烤漆或阳极处理

■ **可加附件:** SDA-4尼龙过滤网、SDA-5铝合金过滤网

※外框边宽尺寸E有三种: 16mm、23mm、32mm

当E=16时、h=42、面尺寸=颈尺寸+27

当E=23时、h=40、面尺寸=颈尺寸+37

当E=32时、h=50、面尺寸=颈尺寸+54

■ **Specification:** (W × H) size can be manufactured according to the design

■ **Surface treatment:** Electrostatic spray, painting or anode treatment

■ **Addible accessories:** SDA-4 nylon filter, SDA-5 aluminum alloy filter

※ There's three sizes for E of the outer frame: 16mm, 23mm, 32mm

When E=16, h=42, surface size = neck size +27

When E=23, h=40, surface size = neck size +37

When E=32, h=50, surface size = neck size +54

SDF-4二面吹小百叶风口 SDF-4 SLICED LEAF TWO-SIDE DIFFUSER >>

■ **材质:** 铝合金型材

■ **特性:**

- SDF-4二面吹小百叶风口突出了线型设计特点，可用于室内和大厅环形分布的出风口和回风口，亦可安装在侧墙或天花板上。
- SDF-4叶片为固定式，斜式送风回风型式，叶片倾斜24度。

■ **Material:** Aluminum alloy sections

■ **Features:**

- SDF-4 sliced leaf two-side diffuser has the outstanding features of linear design, which is used for circular distributed air outlet and rectum in the hall.
- The leaf of SDF-4 type is fixed and can be tilted for 24 degrees.

■ **Surface treatment:** Electrostatic spray, painting or anode treatment

■ **表面处理:** 静电喷塑、烤漆或阳极处理

■ **可加附件:** SDA-1人字调节阀、SDA-4尼龙过滤网

※外框边宽尺寸E有三种: 16mm、23mm、32mm

当E=16时、h=42、面尺寸=颈尺寸+27

当E=23时、h=40、面尺寸=颈尺寸+37

当E=32时、h=50、面尺寸=颈尺寸+54

※最大长度为3米，超过时，可以把两节或多节拼起来使用。

■ **Addible accessories:** SDA-1 air volume control switch, SDA-4 nylon filter

※ There's three sizes for E of the outer frame: 16mm, 23mm, 32mm

When E=16, h=42, surface size = neck size +27

When E=23, h=40, surface size = neck size +37

When E=32, h=50, surface size = neck size +54

※ The longest length is 3 meters, if it is over 3 meters, you can combine 2 or several parts together.

SDF-5固定格栅风口 SDF-5 FIXED GRILLE DIFFUSER

结构示意图
Structure scheme

■ **材质:** 铝合金型材

■ **特性:**

- SDF-5型突出了线形设计的特点, 可用于大厅环形分布的出风口和回风口。
- SDF-5型叶片为固定式, 最长为3米, 超过时可采用拼接方式。

■ **规格尺寸:** (W × H) 尺寸可依据设计制造

■ **Material:** Aluminum alloy sections

■ **Features:**

- SDF-5 type has the outstanding features of linear design, which is used for circular distributed air outlet and return in the hall.
- SDF-5 leaf is fixed type, the longest one is 3 meters and it can be joined if the length is over 3 meters.

■ **Specification:** (W × H) size can be manufactured according to the design

■ **可加附件:** SDA-1人字调节阀、SDA-4尼龙过滤网。

■ **表面处理:** 静电喷塑、烤漆

※外框边宽尺寸E有三种: 16mm、23mm、32mm

当E=16时、h=42、面尺寸=颈尺寸+27

当E=23时、h=40、面尺寸=颈尺寸+37

当E=32时、h=50、面尺寸=颈尺寸+54

※最大长度为3米, 超过时, 可以把两节或多节拼起来使用。

■ **Addible accessories:** SDA-1 air volume control switch, SDA-4 nylon filter

※There's three sizes for E of the outer frame: 16mm, 23mm, 32mm

When E=16, h=42, surface size = neck size +27

When E=23, h=40, surface size = neck size +37

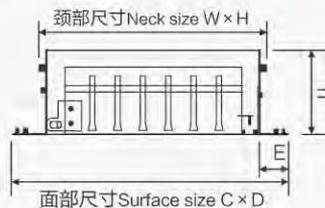

When E=32, h=50, surface size = neck size +54

※The longest length is 3 meters, if it is over 3 meters, you can combine 2 or several parts together.

SDF-5K可开式固定格栅风口 SDF-5K FIXED GRILLE OPEN DIFFUSER

结构示意图
Structure scheme

■ **材质:** 铝合金型材

■ **特性:**

- SDF-5K可开式固定格栅风口是在SDF-5固定格栅风口的基础上增加了一个内边框, 整个风口呈活门型式, 有利于安装和过滤网的配套使用, 常用于客房、大厅的回风。
- 用手轻拨活门上两边门栓, 活门即可打开、抽出过滤网洗清, 关闭时, 只要将活门推上, 两边弹簧门栓即可自动上锁, 外表平整如一。

■ **Material:** Aluminum alloy sections

■ **Features:**

- SDF-5K sliced leaf open outlet has increased an internal frame based on SDF-5 sliced leaf one side diffuser. The whole air outlet is of valve type, which is easy to install and equip with filter. It is widely used for air return in guest rooms and lobbies of the hotel.
- The valve can be opened easily when you move the bolt on both sides and then take the filter out and clean it. The spring bolt on both sides can be locked automatically if you push the valve. The outer surface looks very even.

■ **规格尺寸:** (W × H) 尺寸可依据设计制造

■ **表面处理:** 静电喷塑、烤漆或阳极处理

■ **可加附件:** SDA-4尼龙过滤网、SDA-5铝合金过滤网

When E=23, h=40, surface size = neck size +37
When E=32, h=50, surface size = neck size +54

SDF-5H固定格栅弧形风口 SDF-5H FIXED GRILLE CURVE AIR OUTLET >>

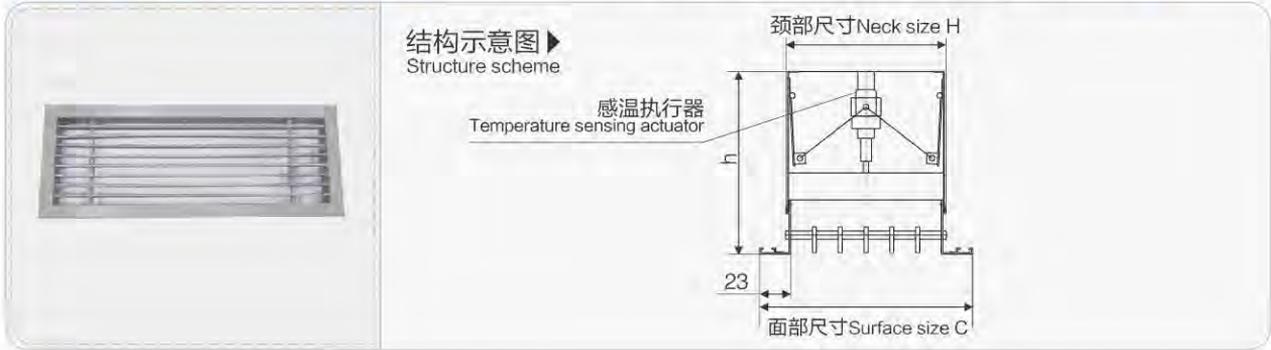

- **材质:** 铝合金型材
- **特性:**
 - 采用专用设备加工, 可制成凸弧, 凹弧, 侧送弧, 顶送弧等型式。
 - 采用SDF-5型相同的型材。
 - 设计个性化, 装潢效果好。
- **规格尺寸:** 尺寸可依据设计制造
- **表面处理:** 静电喷塑、烤漆
- **Material:** Aluminum alloy sections
- **Features:**
 - We can use special equipment to make such types as convex, concave, side blowing curve or top blowing curve.
 - Use the same material as SDF-5 type.
 - The design can be personalized and has good decorative result.
- **Specification:** ($W \times H$) size can be manufactured according to the design
- **Surface treatment:** Electrostatic spray, painting

SDF-5-T温控固定格栅风口 SDF-5-T TEMPERATURE SENSING FIXED GRILLE DIFFUSER

■ 特性:

SDF-5-T温控固定格栅风口颈部装有感温执行器，能自动感测气流温度，并驱动风口颈部的调节板，以改变风口的吹出面积，从而调节气流的吹出速度。当夏季送风温度 $\leq 17^{\circ}\text{C}$ 时，调节板自动调为全开，风口吹出面积增大，气流吹出速度减小，避免明显的冷风吹出感；当冬季送风温度 $\geq 27^{\circ}\text{C}$ 时，调节板自动关小，气流吹出速度增快，使热风获得更远的送风距离。可满足冬夏季不同工况下的送风要求。感温执行器无需人工或电源及电控设备，具有节能、环保、性能稳定、安装简便、免维护等优点。

■ Feature:

SDF-5-T temperature sensing flat leaf diffuser assembles temperature sensing actuator in the neck and it can sense the airflow temperature automatically, It can drive the adjusting plate in the neck of the outlet to change the airflow area so that it can adjust the airflow velocity. When the air supply temperature is $\leq 17^{\circ}\text{C}$ in Summer, the adjusting plate will open completely and then the airflow area increases and the airflow velocity reduces so that it can avoid the feeling of blowing cooling air. When the air supply temperature is $\geq 27^{\circ}\text{C}$ in Winter, the adjusting plate will close and then the airflow velocity increases so that the hot air can reach further distance. Therefore, it can meet air supply requirement both in Summer and Winter. The temperature sensing actuator doesn't need manual or power electronic equipment. It has such features as energy saving, environmental protection, stable function, simple assembly as well as easy maintenance.

※1. 表中冷热风表示风口在冷热不同温度下，等温气流性能吹出系数。
 2. 域气流为0.5m/s。
 3. 表中数据对应的风口颈部长度均为1000mm。

※1. The hot and cold wind in the table indicates the blowing coefficient of the isothermal airflow performance at different temperatures of the hot and cold air.
 2. The domain airflow is 0.5 m/s.
 3. The length of the tuyere corresponding to the data in the table is 1000mm.

SDF-6固定百叶风口 SDF-6 FIXED LOUVER OUTLET >>

结构示意图
Structure scheme

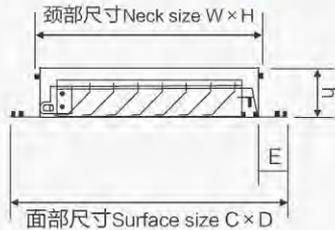

- **材质:** 铝合金型材
- **特性:** SDF-6固定百叶风口适合于一般办公室及宾馆等的回风场合，叶片为固定式。
- **规格尺寸:** (W×H) 尺寸可依据设计制作制造
- **Material:** Aluminum alloy sections
- **Features:** SDF-6 fixed louver outlet is used in such places as offices and hotels. The leaf is fixed.
- **Specification:** (W x H) size can be manufactured according to the design
- **Surface treatment:** Electrostatic spray, painting or anode treatment

- **表面处理:** 静电喷塑、烤漆或阳极处理
- **可加附件:** SDA-4尼龙过滤网、SDA-5铝合金过滤网
※外框边宽尺寸E有三种: 16mm、23mm、32mm
当E=16时、h=42、面尺寸=颈尺寸+27
当E=23时、h=40、面尺寸=颈尺寸+37
当E=32时、h=50、面尺寸=颈尺寸+54
- **Addible accessories:** SDA-4 nylon filter, SDA-5 aluminum alloy filter
※There's three sizes for E of the outer frame: 16mm, 23mm, 32mm
When E=16, h=42, surface size = neck size +27
When E=23, h=40, surface size = neck size +37
When E=32, h=50, surface size = neck size +54

SDF-6K可开式固定百叶风口 SDF-6K FIXED LOUVER OPEN OUTLET >>

结构示意图
Structure scheme

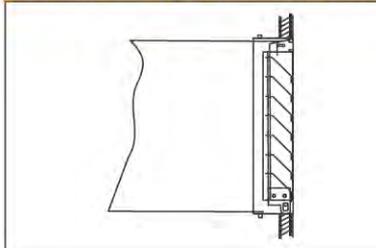

- **材质:** 铝合金型材
- **特性:**
 - SDF-6K可开式百叶回风口的基础上增加了一个内边框，整个风口呈活门型式，有利于安装和过滤网的配套使用，常用于客房、大厅的回风。
 - 用手轻拨活门上两边门栓，活门即可打开、抽出过滤网洗清，关闭时，只要将活门推上，两边弹簧门栓即可自动上锁，外表平整如一。
- **Material:** Aluminum alloy sections
- **Features:**
 - SDF-6K sliced leaf open outlet has increased an internal frame based on SDF-5 sliced leaf one side diffuser. The whole air outlet is of valve type, which is easy to install and equip with filter. It is widely used for air return in guest rooms and lobbies of the hotel.
 - The valve can be opened easily when you move the bolt on both sides and then take the filter out and clean it. The spring bolt on both sides can be locked automatically if you push the valve. The outer surface looks very even.

- **规格尺寸:** (W×H) 尺寸可依据设计制作制造
- **表面处理:** 静电喷塑、烤漆或阳极处理
- **可加附件:** SDA-4尼龙过滤网、SDA-5铝合金过滤网
※外框边宽尺寸E有三种: 16mm、23mm、32mm
当E=16时、h=42、面尺寸=颈尺寸+27
当E=23时、h=40、面尺寸=颈尺寸+37
当E=32时、h=50、面尺寸=颈尺寸+54
- **Specification:** (W x H) size can be manufactured according to the design
- **Surface treatment:** Electrostatic spray, painting or anode treatment
- **Addible accessories:** SDA-4 nylon filter, SDA-5 aluminum alloy filter
※There's three sizes for E of the outer frame: 16mm, 23mm, 32mm

SDF-7方型散流器 SDF-7 SQUARE DIFFUSER >>

结构示意图
Structure scheme

- **材质:** 铝合金型材
- **特性:**
 - SDF-7型有多层锥型平行叶片组成, 其吹出气流属贴附型(平送), 无须担心吹风感。
 - 内锥叶片与外框为分离式结构, 以便安装和调节风量。
- **Material:** Aluminum alloy sections
- **Features:**
 - SDF-7 type is composed of multilayer cone paralleled leaves. The air blowing is of attachment type and there's no need to worry about blowing feeling.
 - Internal cone leaf and outer frame is a separate structure, which is easy to install and adjust air volume.
 - The air can be made to blow out from 1~4 side.
- 可做成1~4面吹之出风型式。
- **规格尺寸:** (W x H) 尺寸可依据设计制造
- **可加附件:** 颈部可与SDA-1人字调节阀配合使用
- **表面处理:** 静电喷塑、烤漆或阳极处理
- **Specification:** (W x H) size can be manufactured according to the design
- **Addible accessories:** Neck can be equipped with SDA-1 air volume control switch
- **Surface treatment:** Electrostatic spray, painting or anode treatment

SDF-8宽边方型散流器 SDF-8 BROADSIDE SQUARE DIFFUSER

结构示意图
Structure scheme

■ **材质:** 铝合金型材

■ **特性:**

- SDF-8型是专门为配合标准龙骨架而设计的一种新款散流器，它是在SDF-7型的基础上增加了一个与龙骨天花板尺寸相同的延伸框，使风口与天花板成一体，省去了天花板开孔的施工步骤，也美化了装饰效果。

■ **Material:** Aluminum alloy sections

■ **Features:** ● SDF-8 type is a kind of new diffuser designed to fit standard keel frame. It has added an extending frame which has the same size as the keel ceiling based on the SDF-7 type. It integrates the outlet with the ceiling, which saves opening holes on the ceiling and also beautifies the decoration.

- Internal cone leaf and outer frame is a separate structure, which is easy to install and adjust air volume.

- 内锥叶片与外框为分离式结构，以便安装和调节风量。

- 吹出气流属贴附型（平送），无须担心吹风感。

- 可做成1-4面吹之出风型式。

■ **规格尺寸:** (W × H) 尺寸可依据设计制造

■ **可加附件:** 颈部可与SDA-1人字调节阀配合使用

■ **表面处理:** 静电喷塑、烤漆或阳极处理

- Air blowing is of attachment type and there's no need to worry about blowing feeling.

- The air can be made to blow out from 1-4 side.

■ **Specification:** size can be manufactured according to the design

■ **Addible accessories:** Neck can be equipped with SDA-1 air volume control switch

■ **Surface treatment:** Electrostatic spray, painting or anode treatment

SDF-7-T温控方型散流器 SDF-7-T TEMPERATURE SENSING SQUARE DIFFUSER

- 特性:** SDF-7-T温控方型散流器颈部装有感温执行器，能自动感测气流温度，并驱动内层叶片在不同送风工况下作上下移动，自动调整送风方向。当夏季送风温度 $\leq 17^{\circ}\text{C}$ 时，内层叶片下移，吹出气流呈水平贴附扩散形态；当冬季送风温度 $\geq 27^{\circ}\text{C}$ 时，内层叶片上移，吹出气流呈垂直下送状态。可满足冬夏季不同工况下的送风要求。感温执行器无需人工或电源及电控设备，具有节能、环保、性能稳定、安装简便、免维护等优点。
- Features:** SDF-7-T temperature sensing square diffuser assembles temperature sensing actuator in the neck and it can sense the airflow temperature automatically. It can drive the inside leaf to move up and down under different air supply conditions to adjust air supply direction automatically. When the air supply temperature is $\leq 17^{\circ}\text{C}$ in Summer, the inside leaf will move downward and blows the air horizontally in diffusion condition. When the air supply temperature is $\geq 27^{\circ}\text{C}$ in Winter, the inside leaf will move upward and blows the air vertically. Therefore, it can meet air supply requirement both in Summer and Winter, The temperature sensing actuator doesn't need manual or power electronic equipment. It has such features as energy saving, environmental protection, stable function, simple assembly as well as easy maintenance.

※H means horizontal air supply condition, V means vertical air supply condition. The reach distance is measured when the air velocity is at 0.5m/s.

SDF-9圆形散流器 SDF-9 ROUND DIFFUSER >>

■ **材质:** 铝板

■ **特性:**

- SDF-9圆型散流器为多层锥体结构，一般安装于冷暖房的天花板上，其吹出气流属贴附型，具有内部诱导性佳、送风温差大、吹出气流均匀、能抑制体感气流等特点。

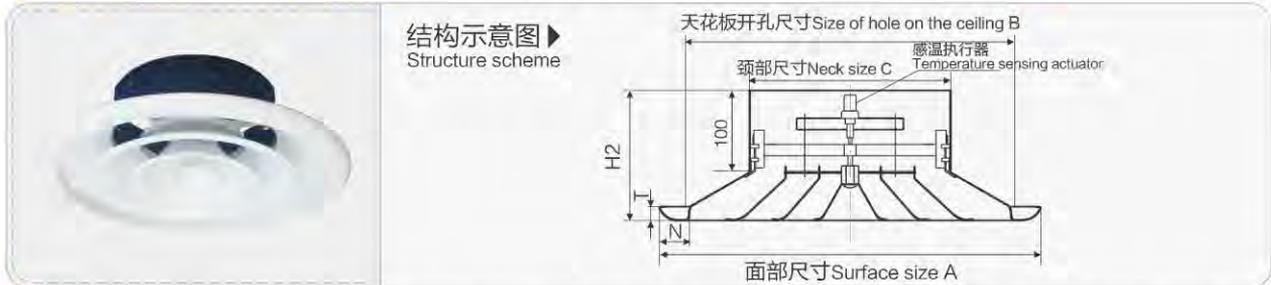

■ **Material:** Aluminum sheet

■ **Features:**

- SDF-9 round diffuser is a multilayer vertebral structure. It is usually installed on the ceiling of cooling and heating house. The air it blows is of attachment type and has such features as good inductivity, big supply air temperature difference, blowing uniform air and inhibition of somato sensory airflow.

- 内层叶片可根据冬夏季不同送风工况进行上下两档调节，夏季吹出气流呈水平，冬季吹出气流呈垂直。
- 叶片与外框为分离式结构，可方便拆卸和安装。
- 采用优质铝板旋压成形工艺，整体强度高、外形美观，表面可配合装饰要求进行静电喷塑。
- 可与SDA-3扇型风量调节阀配合使用，从正面即可方便调节风量。
- The inner leaf can be regulated up and down according to different air supply in winter or summer. The air is horizontal in summer and vertical in winter.
- It is a separate structure for the leaf and frame which is easy to disassemble and assemble.
- It is made by spinning forming process with high-quality aluminum plate and has high strength and beautiful outlook. Electrostatic spray can be applied to the surface according to the decorative requirement.
- It can be equipped with SDA-3 sector air volume control switch to adjust the air volume from the front side.

SDF-9-T温控圆形散流器 SDF-9-T TEMPERATURE SENSING ROUND DIFFUSER >>

※H指水平吹出状态，V指垂直吹出状态，到达距离为风速在0.5m/s处测得。

※H means horizontal air supply condition, V means vertical air supply condition. The reach distance is measured when the air velocity is at 0.5m/s.

SDF-10圆盘散流器 SDF-10 DISC DIFFUSER >>

- **材质:** 铝板
- **特性:**
 - SDF-10圆盘散流器的叶片为盘状结构，其吹出气流不易减速，相比于SDF-9型其到达距离更远，可装在较高的天花板上。
 - 内层叶片可根据冬夏季节不同送风工况进行上下两档调节，夏季吹出气流呈水平，冬季吹出气流呈垂直。
- **Material:** Aluminum sheet
- **Features:**
 - The leaf of SDF-10 type is disc structure and the air speed is not easy to reduce. Compared with SDF-9 type, it reaches further distance and can be installed on higher ceiling.
 - The inner leaf can be regulated up and down according to different air supply in winter or summer. The air is horizontal in summer and vertical in winter.
- 叶片与外框为分离式结构，可方便拆卸和安装。
- 采用优质铝板旋压成形工艺，整体强度高、外形美观，表面可配合装饰要求进行静电喷塑。可与SDA-3扇型风量调节阀配合使用。
- It is a separate structure for the leaf and frame which is easy to disassemble and assemble.
- It is made by spinning forming process with high-quality aluminum plate and has high strength and beautiful outlook, Electrostatic spray can be applied to the surface according to the decorative requirement.
- It can be equipped with SDA-3 sector air volume control switch.

SDF-10-T温控圆盘散流器 SDF-10-T TEMPERATURE SENSING DISC DIFFUSER

■ **特性:**

SDF-10-T温控圆盘散流器颈部装有感温执行器，能自动感测气流温度，并驱动内层叶片在不同送风工况下作上下移动，自动调整送风方向。当夏季送风温度 $\leq 27^{\circ}\text{C}$ 时，内层叶片上移，吹出气流呈垂直下送状态。可满足冬夏季不同工况下的送风要求。感温执行器无需人工或电源及电控设备，具有节能、环保、性能稳定、安装简便、免维护等优点。

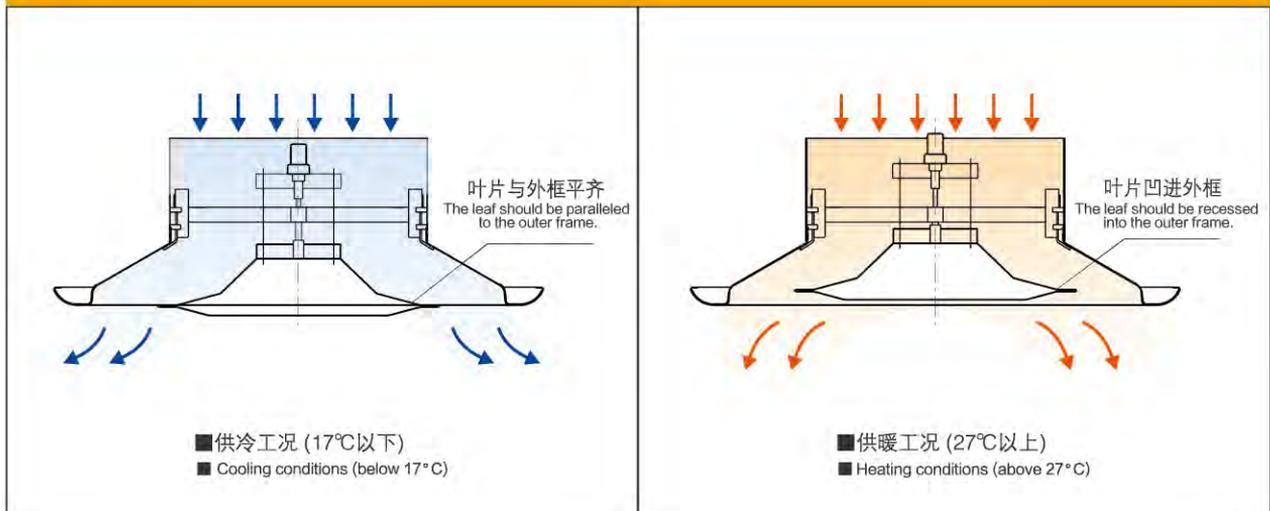

■ **Features:**

SDF-10-T temperature sensing disc type difuser assembles temperature sensing actuator in the neck and it can sense the airflow temperature automatically. It can drive the inside leaf to move up and down under different air supply conditions to adjust air supply direction automatically. When the air supply temperature is $\leq 17^{\circ}\text{C}$ in Summer, the inside leaf will move downward and blows the air horizontally in diffusion condition. When the air supply temperature is $\geq 27^{\circ}\text{C}$ in Winter, the inside leaf will move upward and blows the air vertically. Therefore, it can meet air supply requirement both in Summer and Winter, The temperature sensing actuator doesn't need manual or power electronic equipment. It has such features as energy saving, environmental protection, stable fuction, simple assembly as well as easy maintenance.

※H指水平吹出状态，V指垂直吹出状态，到达距离为风速在0.5m/s处测得。

※H means horizontal air supply condition, V means vertical air supply condition.

The reach distance is measured when the air velocity is at 0.5m/s.

SDF-11防水百叶风口 SDF-11 WATERPROOF LOUVER AIR OUTLET >>

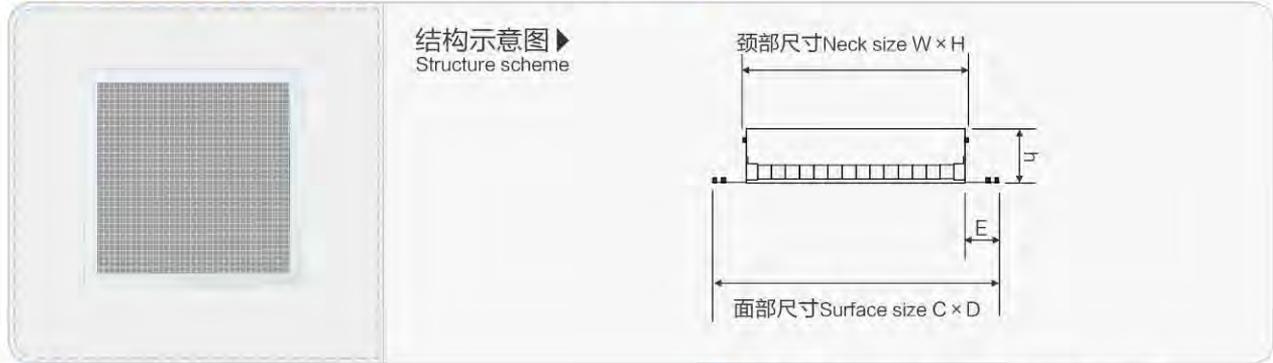

- **材质:** 铝合金型材
- **特性:** SDF-11防水百叶风口其叶片设计有防水功能, 尤其适合安装在外墙及地下室机房的回风系统上, 叶片为固定式。
- **规格尺寸:** (W × H) 尺寸可依据设计制造
- **Material:** Aluminum alloy sections
- **Features:** ● The leaf for SDF-11 waterproof return air louver outlet is designed to be waterproof, which can be installed on outer wall or return air system of the basement room. The leaf is of fixed type.
- **Specification:** (W × H) size can be manufactured according to the design
- **表面处理:** 静电喷塑、烤漆或阳极处理
- **可加附件:** SDA-4尼龙过滤网、SDA-5铝合金过滤网
※外框边宽尺寸E有一种: 32mm
当E=32时、h=50、面尺寸=颈尺寸+54
- **Surface treatment:** Electrostatic spray, painting or anode treatment
- **Addible accessories:** SDA-4 nylon filter, SDA-5 aluminum alloy filter
※There's one size for E of the outer frame: 32mm
When E=32, h=50, surface size = neck size +54

- NC值以室内吸收衰减量10dB又10⁻¹²瓦特为基准
- NC value is based on the value of the indoor absorption attenuation to be 10dB and 10⁻¹² watt.

SDF-12蛋格式风口 SDF-12 EGG FORMAT OUTLET >>

■ **材质:** 铝合金型材

■ **特性:**

- SDF-12蛋格式回风口适用于空调工程系统作回风用，一般安装于天花板上。
- 回风有效面积大，回风效果佳。
- 叶片为固定式，叶片间距 13×13 。
- SDF-12蛋格式回风口也作出风口用。

■ **Material:** Aluminum alloy sections

■ **Features:** ● SDF-12 egg format outlet is used for air return about air conditioning system, which is installed on the ceiling.

- It has bigger effective area and better result for air return.
- The leaf is fixed and the distance between them is 13×13 .
- SDF-12 egg format return air outlet is also used for air outlet.

■ **Specification:** (W x H) size can be manufactured according to the design

■ **规格尺寸:** (W x H) 尺寸可依据设计制造

■ **表面处理:** 静电喷塑、烤漆或阳极处理

■ **可加附件:** SDA-1人字调节阀、SDA-4尼龙过滤网、SDA-5铝合金过滤网

※外框边宽尺寸E有二种: 23mm、32mm

当E=23时、h=40、面尺寸=颈尺寸+37

当E=32时、h=50、面尺寸=颈尺寸+54

■ **Surface treatment:** Electrostatic spray, painting or anode treatment

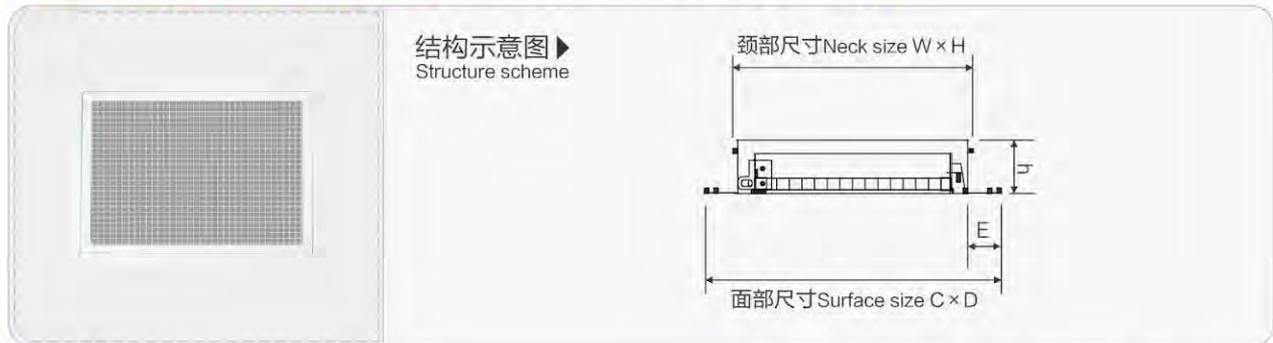

■ **Addible accessories:** SDA-1 air volume control switch, SDA-4 nylon filter, SDA-5 aluminum alloy filter

※There's two sizes for E of the outer frame: 23mm, 32mm

When E=23, h=40, surface size = neck size +37

When E=32, h=50, surface size = neck size +54

SDF-12K可开式蛋格式风口 SDF-12K EGG FORMAT OPEN OUTLET >>

■ **材质:** 铝合金型材

■ **特性:**

- SDF-12K可开式蛋格式风口是在SDF-12蛋格式风口的基础上增加了一个内边框，整个风口呈活门型式，有利于安装和过滤网的配套使用，常用于客房、大厅的回风。

■ **Material:** Aluminum alloy sections

■ **Features:** ● SDF-12K egg format open outlet has increased an internal frame based on SDF-12 egg format return air outlet. The whole air outlet is of valve type, which is easy to install and equip with filter. It is widely used for air return in guest rooms and lobbies of the hotel,

- The valve can be opened easily when you move the bolt on both sides and then take the filter out and clean it. The spring bolt on both sides can be locked automatically if you push the valve. The outer surface looks very even.

- 用手轻拨活门上两边门栓，活门即可打开、抽出过滤网洗清，关闭时，只要将活门推上，两边弹簧门栓即可自动上锁，外表平整如一。

■ **规格尺寸:** (W x H) 尺寸可依据设计制造

■ **表面处理:** 静电喷塑、烤漆或阳极处理

■ **Surface treatment:** (W x H) size can be manufactured according to the design

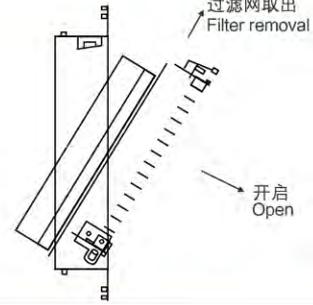

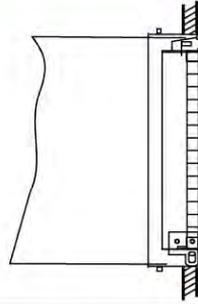

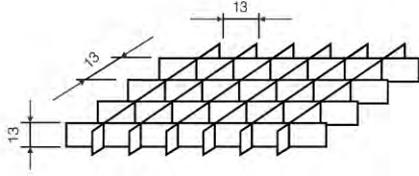

■ **Surface treatment:** Electrostatic spray, painting or anode treatment

■ **Addible accessories:** SDA-4 nylon filter, SDA-5 aluminum alloy filter

■ NC值以室内吸收衰减量10dB又10⁻¹²瓦特为基准 ■ NC value is based on the value of the indoor absorption attenuation to be 10dB and 10⁻¹² watt.
 ■ 依据A.D.C.标准测试 ■ It is tested according to A.D.C standard.

SDF-13自垂式百叶风口 SDF-13 NATURAL DROOP LOUVER OUTLET >>

■ **材质:** 铝合金型材

■ **特性:** SDF-13自垂式百叶风口适用于具有正压的空调房间自动排气。通常情况下靠风口的百叶自重而自然下垂, 隔绝室内外的空气交换, 当室内气压大于室外气压时, 气流将百叶片吹开而向外排, 反之, 当室内气压小于室外时, 气流则不能反向流入室内, 该风口具有单向止回作用。

■ **Material:** Aluminum sheet

■ **Features:** SDF-13 natural droop louver outlet is used for automatic air venting in the air conditioning room with positive pressure. Usually it will take advantage of the louver's weight about the outlet and drops naturally to prevent the air exchange between the indoor and outdoor. When the indoor air pressure is higher than the outdoor air pressure, the airflow will be blown out from the louver. Otherwise, if the indoor air pressure is lower, the airflow cannot get into the room. Therefore, this outlet can be the retaining valve.

■ **规格尺寸:** (W x H) 尺寸可依据设计制造

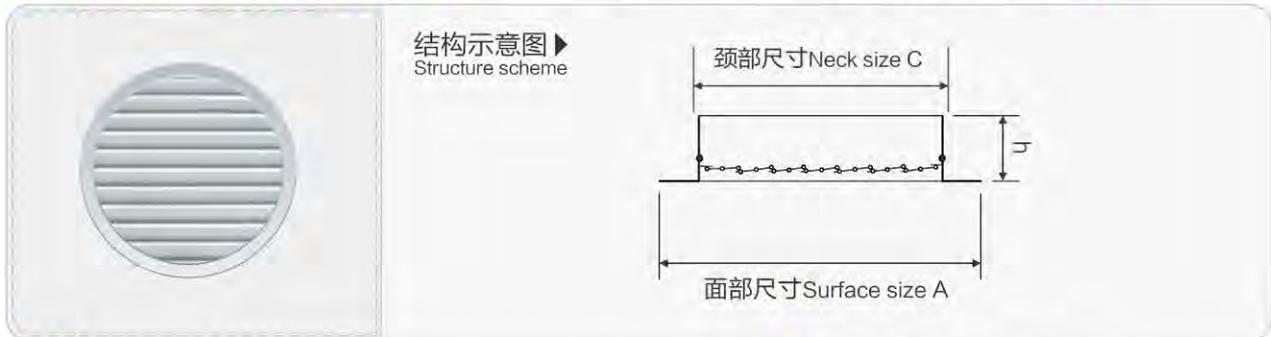

■ **表面处理:** 静电喷塑、烤漆或阳极处理
※外框边宽尺寸E有二种: 23mm、32mm
当E=23时、h=40、面尺寸=颈尺寸+37
当E=32时、h=50、面尺寸=颈尺寸+54

■ **Specification:** (W x H) size can be manufactured according to the design

■ **Surface treatment:** Electrostatic spray, painting or anode treatment

※There's two sizes for E of the outer frame:
23mm, 32mm
When E=23, h=40, surface size = neck size +37
When E=32, h=50, surface size = neck size +54

SDF-13R圆形自垂百叶风口 SDF-13R CIRCULAR NATURAL DROOP LOUVER OUTLET >>

■ **材质:** 铝合金型材

■ **特性:** SDF-13R圆形自垂百叶风口适用于具有正压的空调房间自动排气。通常情况下靠风口的百叶自重而自然下垂, 隔绝室内外的空气交换, 当室内气压大于室外气压时, 气流将百叶片吹开而向外排, 反之, 当室内气压小于室外时, 气流则不能反向流入室内, 该风口具有单向止回作用。

■ **Material:** Aluminum sheet

■ **Features:** SDF-13R natural droop return air louver outlet is used for automatic air venting in the air conditioning room with positive pressure. Usually it will take advantage of the louver's weight about the outlet and drops naturally to prevent the air exchange between the indoor and outdoor. When the indoor air pressure is higher than the outdoor air pressure, the airflow will be blown out from the louver. Otherwise, if the indoor air pressure is lower, the airflow cannot get into the room. Therefore, this outlet can be the retaining valve.

■ **规格尺寸:** 尺寸可依据设计制造

※外框边宽尺寸E有二种: 23mm、32mm
当E=23时、h=40、面尺寸=颈尺寸+37
当E=32时、h=50、面尺寸=颈尺寸+54

■ **Specification:** It can be manufactured according to the design.

■ **Surface treatment:** Electrostatic spray, painting

※There's two sizes for E of the outer frame:
23mm, 32mm
When E=23, h=40, surface size = neck size +37
When E=32, h=50, surface size = neck size +54

SDF-14条形风口 SDF-14 SLOTTED DIFFUSER

■ **材质:** 铝合金型材

■ **特性:** ● SDF-14条形风口, 可作出风和回风使用, 每组槽内有两个可叶片, 用以控制气流方向及大小, 从外部就可方便地调整。
● SDF-14条形风口, 一般安装在天花板上, 也可安装在侧墙或其它位置。

■ **Material:** Aluminum alloy sections

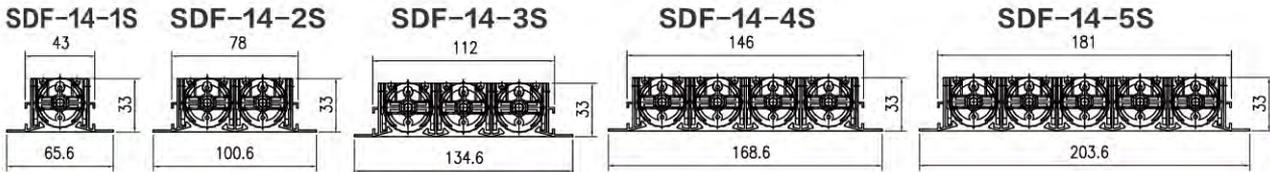

■ **Features:** ● SDF-14 slotted diffuser can be used as both air supply and air return. There's two adjustable leaves in each slot in order to control the direction and volume of airflow. It can be also adjusted from outside.
● SDF-14 slotted diffuser is usually installed on the ceiling but it can also be installed on side wall or other position.

■ **规格尺寸:** SDF-14-1S SDF-14-2S SDF-14-3S SDF-14-4S

■ **表面处理:** 静电喷塑、烤漆或阳极处理, 叶片颜色一般为黑色
※可配合静压箱使用
※最大长度为3米, 超过时, 可以把两节或多节拼起来使用。

■ **Specification:** SDF-14-1S SDF-14-2S SDF-14-3S SDF-14-4S

■ **Surface treatment:** Electrostatic spray, painting or anode treatment and the color of leaf is black.
※ It can be equipped with plenum chamber.
※ The longest length is 3 meters, if it is aver 3 meters, you can combine 2 or several parts together.

■ 风口测试长度以1.2M为基准

■ 到达距离以终端风速在0.5m/s~0.25m/s测得

■ NC值以室内吸收衰减量10dB又10⁻¹²瓦特为基准

■ NC值栏[-]表示NC在20以下

■ 依据A.D.C.标准测试

■ The testing length is based on 1.2M.

■ The reach distance is measured when the terminal air velocity is at 0.5m/s—0.25m/s.

■ NC value is based on the value of the indoor absorption attenuation to be 10dB and 10⁻¹²watt.

■ [-] means NC value is below 20

■ It is tested according to A.D.C standard.

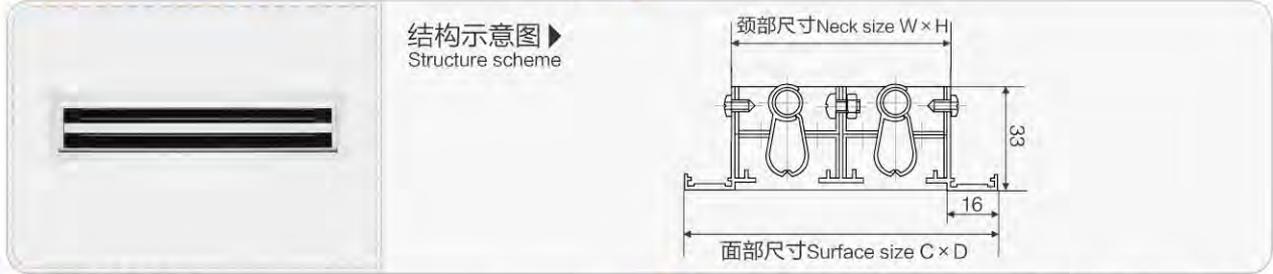

■ 风长度改变时, 则到达距离为NC修正值如下表

■ If we change the length, the reach distance and NC value is corrected according to the following form.

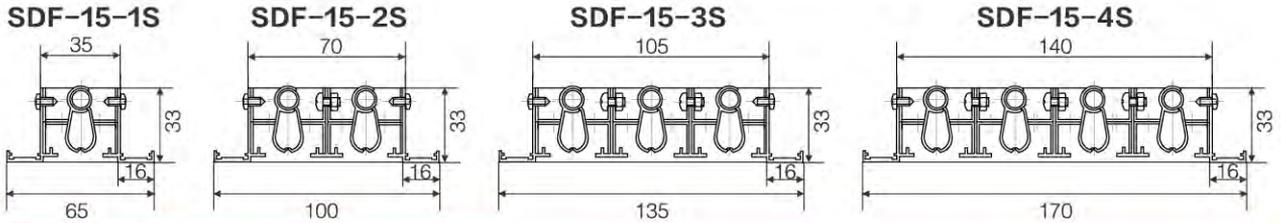

有效长度 (M) Effective length	0.6	1.2	2.4
出风NC Air supply	-5	0	3
回风NC Air return	-3	0	2

例: 若长度为2M时则NC值加3, 而到达距离均乘以1.2倍
Eg: If the length is 2M, NC value plus 3 while the reach distance multiply 1.2.

SDF-15爪型风口 SDF-15 SLOTTED DIFFUSER

SDF-17遮光型风口 SDF-17 SHADING OUTLET

- **材质:** 铝合金型材
- **特性:**
 - SDF-17遮光型风口叶片呈A型纵向排列, 除应用于回风系统外, 兼具有遮光之效果, 适用于一般暗房, 电影院等须阻隔光线之场合。
 - SDF-17遮光型风口外框及叶片, 组合牢固, 其结构强度较优于其它之回风口。
- **Material:** Aluminum alloy sections
- **Features:**
 - The leaf for SDF-17 shading outlet is end to end placed like an "A" It is not only used in air return system but also used in dark room like cinemas which need to prevent the light.
 - The outer frame and leaf is combined very solid and it's structure strength is better than other outlets.

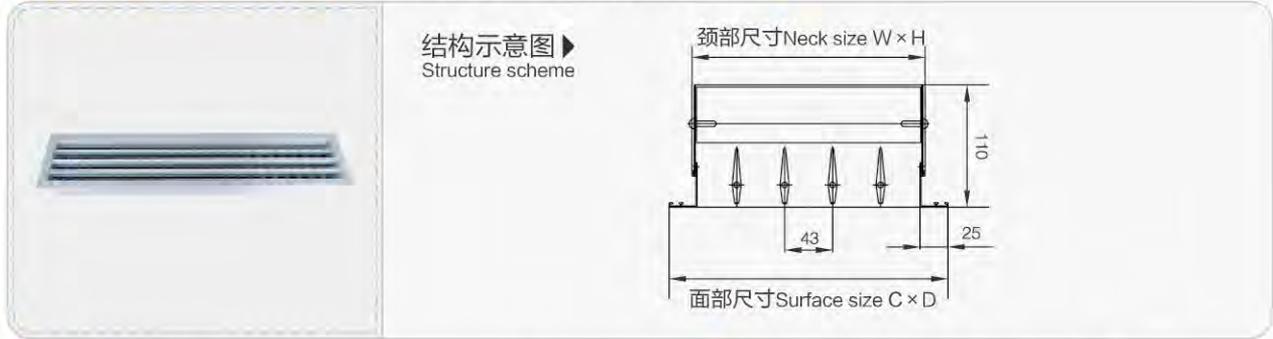

- **规格尺寸:** (W x H) 尺寸可依据设计制造
- **表面处理:** 静电喷塑、烤漆或阳极处理
- **可加附件:** SDF-4尼龙过滤网、SDF-5铝合金过滤网
※外框边宽尺寸E有二种: 23mm、32mm
当E=23时、h=40、面尺寸=颈尺寸+37
当E=32时、h=50、面尺寸=颈尺寸+54
- **Specification:** (W x H) size can be manufactured according to the design
- **Surface treatment:** Electrostatic spray, painting or anode treatment
- **Addable accessories:** SDA-4 nylon filter, SDA-5 aluminium alloy filter
※There's two sizes for E of the outer frame: 23mm, 32mm
When E=23, h=40, surface size = neck size +37
When E=32, h=50, surface size = neck size +54

SDF-19-T温控翼型风口 SDF-19-T TEMPERATURE SENSING AIRFOIL NOZZLE >>

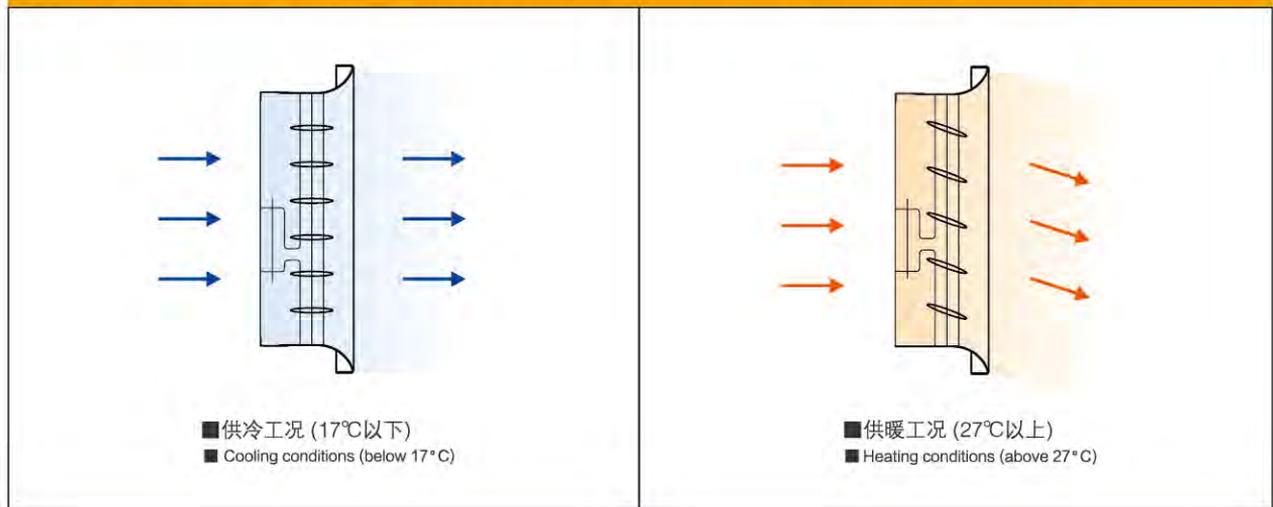

■ **特性:**

SDF-19-T温控翼型风口颈部装有感温执行器.叶片采用翼型设计,具有阻力小、射程远、造型美观等特点。能自动感测气流温度,并自动调节出风方向。当夏季送风温度 $\leq 17^{\circ}\text{C}$ 时,叶片可以自动调节到供冷模式,气流呈水平吹出;当冬季送风温度 $\geq 27^{\circ}\text{C}$ 时,叶片可以自动调节到供暖模式,气流呈斜下方向吹出,可抑制热风向上飘移的特性,快速达到设计温度。可满足冬夏季不同工况下的送风要求。感温执行器无需人工或电源及电控设备,具有节能、环保、性能稳定、安装简便、免维护等优点。

■ **Features:**

SDF-19-T temperature sensing airfoil nozzle assembles temperature sensing actuator in the neck. The leaf use airfoil design and has such features like small resistance, far range and beautiful outlook.It can sense the airflow temperature and adjust the direction automatically. When the air supply temperature is $\leq 17^{\circ}\text{C}$ in Summer, the leaf can be adjusted to cooling mode and the nozzle flows the air horizontally. When the air supply temperature is $\geq 27^{\circ}\text{C}$ in Winter, the leaf can be adjusted to heating mode and the nozzle flows the air obliquely, which can prevent the hot air from drifting upward and reach the designed temperature rapidly. Therefore, it can meet air supply requirement both in Summer and Winter. The temperature sensing actuator doesn't need manual or power electronic equipment. It has such features as energy saving, environmental protection, stable function, simple assembly as well as easy maintenance.

※ 到达距离是指风口到风速0.5m/s处的距离。

● 压损失和发生噪音的值分水平吹出和斜向吹出表示。

※ The arrival distance is the distance from the tuyere to the wind speed of 0.5m/s.

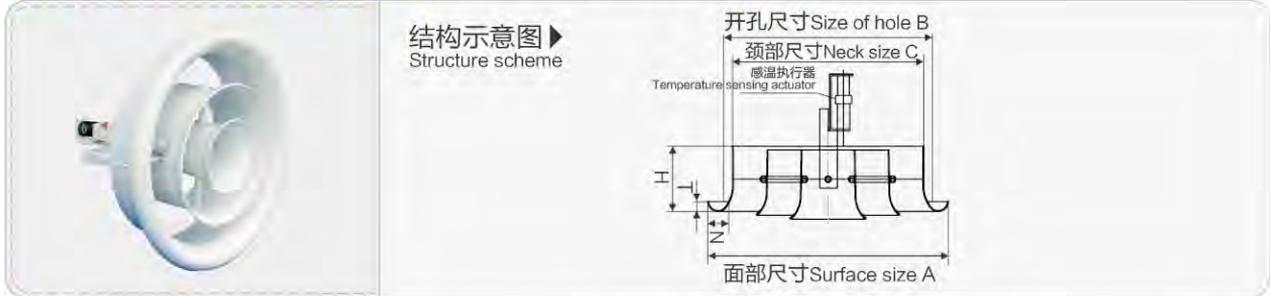

● The values of pressure loss and noise generation are expressed in terms of horizontal blowing and oblique blowing.

SDF-20圆环型风口 SDF-20 CIRCULAR OUTLET >>

- **材质:** 铝板
- **特性:**
 - SDF-20圆环型风口一般用于人员活动范围有较大距离的场合,如影剧院、会展中心、体育馆、工厂等。
 - 采用最佳空气动力学原理设计的多层环型结构,具有阻力低、射程远、噪音低等特点。
- **Material:** Aluminum sheet
- **Features:**
 - SDF-20 circular outlet is usually used in such places as theatres, exhibition centers, gymnasiums, plants and so on.
 - It is a multi-layer circular structure designed according to the principle of best aerodynamics and has such features as low resistance, far range, low noise.
- 外框固定后,内环叶片可根据冬夏季节不同的气流组织进行上下45°转动。
- 采用优质铝板旋压成形工艺,整体强度高、外形美观,表面可配合装饰要求进行静电喷塑。
- 可与SDA-3扇型风量调节阀配合使用,从正面即可方便调节风量。
- After the frame is fixed, the leaf inside can rotate 45° up and down according to different air flow in Winter and Summer.
- It is made by spinning forming process with high-quality aluminum plate and has high strength and beautiful outlook. Electrostatic spray can be applied to the surface according to the decorative requirement.
- It can be equipped with SDA-3 sector air volume control switch and the air volume can be adjusted from the front side.

SDF-20-T温控圆环型风口 SDF-20 CIRCULAR OUTLET >>

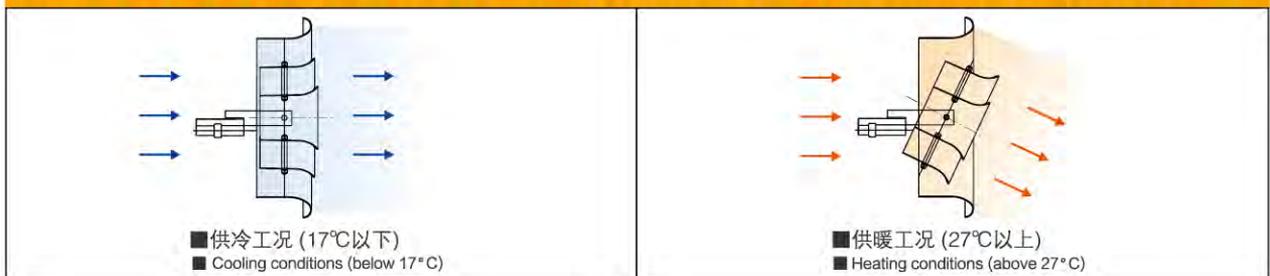

- **特性:**

SDF-20-T感温圆环型喷流风口颈部装有感温执行器,能自动感测气流温度,并自动驱动内层喷口以改变送风角度。当夏季送风温度 $\leq 17^{\circ}\text{C}$ 时,喷口气流呈水平吹出;当冬季送风温度 $\geq 27^{\circ}\text{C}$ 时,喷口气流呈斜下方向吹出。可满足冬夏季不同工况下的送风要求。感温执行器无需人工或电源及电控设备,具有节能、环保、性能稳定、安装简便、免维护等优点。
- **Features:**

SDF-20-T temperature sensing circular outlet assembles temperature sensing actuator in the neck and can sense the airflow temperature automatically. And it can drive inside nozzle automatically to change the air supply angle. When the air supply temperature is $\leq 17^{\circ}\text{C}$ in Summer, the nozzle flows the air horizontally. SDF-21-T温控涡流风口 SDF-21-T TEMPERATURE SENSING SWIRL DIFFUSER

特性:

SDF-21-T温控涡流风口颈部装有感温执行器，能自动感测气流温度，并自动驱动叶片角度以改变送风状态。当夏季送风温度 $\leq 17^{\circ}\text{C}$ 时，叶片可以自动调节到供冷模式，气流呈水平吹出；当冬季送风温度 $\geq 27^{\circ}\text{C}$ 时，叶片可以自动调节到供暖模式，气流呈垂直方向吹出。可满足冬夏季不同工况下的送风要求。感温执行器无需人工或电源及电控设备，具有节能、环保、性能稳定、安装简便、免维护等优点。

Features:

SDF-21-T temperature sensing swirl diffuser assembles temperature sensing actuator in the neck. It can sense the airflow temperature automatically and drive the leaf angle to change the air supply condition. When the air supply temperature is $\leq 17^{\circ}\text{C}$ in Summer, the leaf can be adjusted to cooling mode and the nozzle flows the air horizontally. When the air supply temperature is $\geq 27^{\circ}\text{C}$ in Winter, the leaf can be adjusted to heating mode and the nozzle flows the air vertically. Therefore, it can meet air supply requirement both in Summer and Winter. The temperature sensing actuator doesn't need manual or power electronic equipment. It has such features as energy saving, environmental protection, stable function, simple assembly as well as easy maintenance.

※ 上表数据以等温气流为测试对象，不等温气流射程应根据送风温差加以修正。

● 扩散半径 (H) 指冷态等温气流的水平距离，到达距离 (V) 指热态时气流的垂直射程，残风速均为0.5m/s计。

※ The data in the above table is measured by the isothermal airflow, and the range of the non-isothermal airflow should be corrected according to the temperature difference of the supply air.

● The diffusion radius (H) refers to the horizontal distance of the cold isothermal airflow, and the arrival distance (V) refers to the vertical range of the airflow in the hot state, and the residual wind speed is 0.5 m/s.

SDF-22-T温控筒形风口 SDF-22-T TEMPERATURE SENSING SWIRL NOZZLE >>

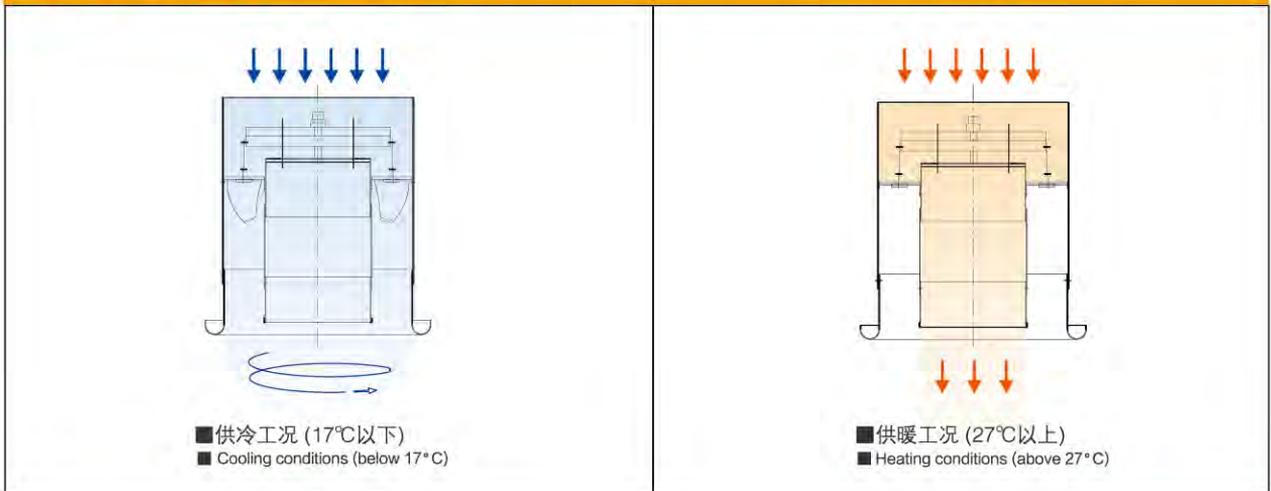

■ **特性:**

SDF-22-T温控筒形风口颈部装有感温执行器，能自动感测气流温度。当夏季送风温度 $\leq 17^{\circ}\text{C}$ 时，风口内置叶片打开，气流为涡旋形态，全面出风；当冬季送风温度 $\geq 27^{\circ}\text{C}$ 时，风口内置叶片关闭，热风只从中心桶喷出，能获得更远的送风距离。解决了热风难以下送的不足。可满足冬夏季不同工况下的送风要求。感温执行器无需人工或电源及电控设备，具有节能、环保、性能稳定、安装简便、免维护等优点。

■ **Features:**

SDF-22-T temperature sensing swirl nozzle assembles temperature sensing actuator in the neck and it can sense the airflow temperature automatically. When the air supply temperature is $\leq 17^{\circ}\text{C}$ in Summer, the leaf inside the nozzle will open, the airflow is in vortex form and it will supply the air completely. When the air supply temperature is $\geq 27^{\circ}\text{C}$ in Winter, the leaf inside the nozzle will close and the hot air can only be blown out from the center barrel to reach further distance and to solve the problem that the hot air cannot be blown downward. Therefore, it can meet air supply requirement both in Summer and Winter. The temperature sensing actuator doesn't need manual or power electronic equipment. It has such features as energy saving, environmental protection, stable function, simple assembly as well as easy maintenance.

※到达距离为风速在0.5m/s处测得。

※The reach distance is measured when the air velocity is at 0.5m/s.

SDF-23圆形斜百叶风口 SDF-23 CIRCULAR OBLIQUE DIFFUSER

- **材质:** 铝板、铝合金型材
- **特性:**
 - SDF-23圆形斜百叶风口为圆型外框线性叶片结构。
 - 叶片倾斜24度，可做成单向和双向气流吹出模式。
 - 叶片与外框为固定式结构，叶片之间采用铝合金圆管分隔，并用螺丝固定。
- **Material:** Aluminum alloy sections
- **Features:**
 - SDF-23 diffuser is circular frame linear leaf structure.
 - When the leaf inclines 24°, it can have one-way and two-way air blowing mode.
 - The leaf and the frame are fixed structures. It uses aluminium round pipe to separate the leaves and fixed by the screw.
- 叶片为铝合金型材，外框采用优质铝板旋压成形工艺，整体强度高、外形美观，表面可配合装饰要求进行静电喷塑。
- 可与SDA-3扇型风量调节阀配合使用，从正面即可方便调节风量。
- The leaf is aluminium alloy sections. The frame is made by spinning forming process with high-quality aluminum plate and has high strength and beautiful outlook. Electrostatic spray can be applied to the surface according to the decorative requirement.
- It can be equipped with SDA-3 sector air volume control switch and the air volume can be adjusted from the front side.

※ H指水平吹出状态，V指垂直吹出状态，到达距离为风速在0.5m/s处测得。
※H means horizontal air supply condition, V means vertical air supply condition. The reach distance is measured when the air velocity is at 0.5m/s.

SRV圆型排气口 SRV ROUND AIR VENT >>

■ **材质:** 不锈钢

特性:

- SRV圆型排气口适用于一般大楼外墙的排气, 此型式的设计为针对大楼及住房的厨房, 厕所的抽排烟风管
- 末端衔接外墙部分使用, 有美化外墙的作用。

■ **Material:** Stainless steel

■ **Features:** ● SRV round air vent is used for air venting for exterior wall of general building. This type is designed for connecting the end of the air pipe for smoke extraction system of the kitchen as well as the toilet of the building to the exterior wall, which also beautifies the wall.

- Inside the round air-vent, there's leaf patch and stainless steel insect-proof screen.

- 圆型排气口内装有百叶片及不锈钢防虫网。
- 劲部附有三片弹簧倒勾片, 在安装时不须螺丝固定, 只要将圆型排气口推入孔内, 以倒勾片卡住排气孔即可固定。

■ **规格尺寸:** Φ100 Φ125 Φ150

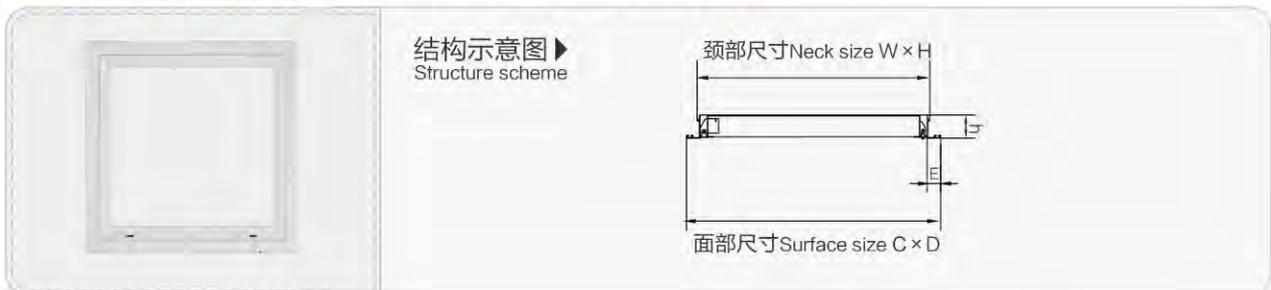

- The neck of the air-vent attaches three spring hook plate.
- There's no need to fix it with the screw when assembling but only to push the round air-vent to the hole and fix it when the hook plate get stuck at the venting hole.

■ **Specification:** Φ100 Φ125 Φ150

SAD铝合金检修口 SAD ALUMINUM ALLOY ACCESS DOOR >>

■ **材质:** 铝合金型材

■ **特性:** SAD铝合金检修口由内外两个框组成, 其内框呈活门形式, 通常安装在天花板上, 作吊顶内设备检修时的出入口。

■ **规格尺寸:** (W×H) 400X400 450X450 500X500 550X550 600X600

■ **Material:** Aluminum alloy sections

■ **Features:** SAD aluminum alloy access door is composed of inner and outer frames. The internal frame is valve type, which is usually installed on the ceiling as the access door when the equipment in the ceiling needs to check.

■ **Specification:** (W×H) 400x 400 450x 450 500x 500 550x550 600 x 600

■ **表面处理:** 静电喷塑、烤漆或阳极处理

※外框边宽尺寸E有二种: 23mm、32mm

当E=23时、h=40、面尺寸=颈尺寸+37

当E=32时、h=50、面尺寸=颈尺寸+54

■ **Surface treatment:** Electrostatic spray, painting or anode treatment

※There's two sizes for E of the outer frame: 23mm, 32mm

When E=23, h=40, surface size = neck size +37

When E=32, h=50, surface size = neck size +54

SDA-1人字调节阀 SDA-1 air volume control switch >>

- **材质:** 镀锌板
- **特性:**
 - 叶片为人字形开启方式, 可调节任意角度, 且自锁性好。
 - 最大尺寸600X600, 超过时采用多个拼接。
- **规格尺寸:** 配合风管或风口尺寸
- **Material:** Galvanized sheet
- **Features:**
 - The leaf can be opened in herringbone way and the angle can be adjusted randomly. It also has good self-locking.
 - The biggest size is 600 x 600. It can be joint together if the size surpasses.
- **Specification:** to fit for the size of the air pipe or outlet.

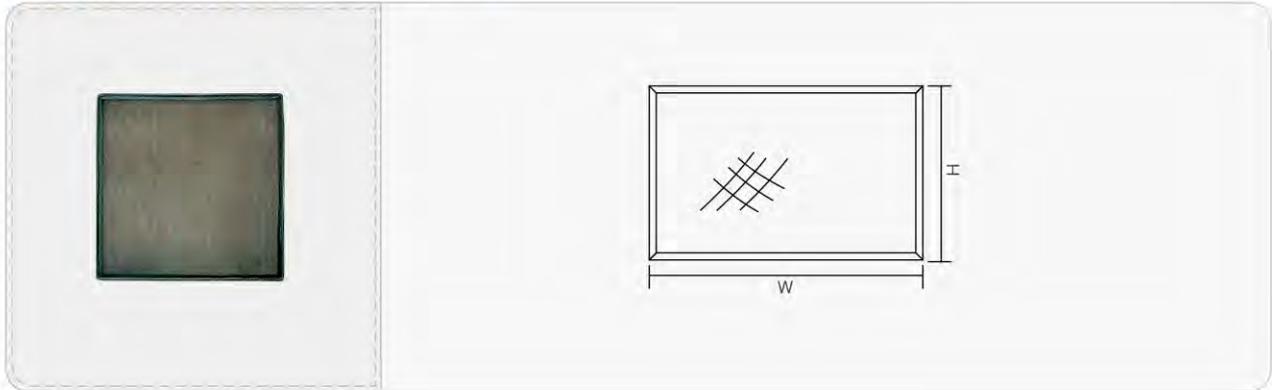

SDA-2方圆罩 SDA-2 square circular cover >>

- **材质:** 铝合金型材
- **特性:** SDA-2方圆罩圆颈处可方便地与铝箔伸缩软管连接。
- **规格尺寸:** 配合风管或风口尺寸
- **Material:** Galvanized sheet
- **Features:**
 - The neck of the SDA-2 square circular cover can easily be connected with the telescopic aluminium foil hose.
- **Specification:** to fit for the size of the air pipe or outlet.

SDA-3扇形风量调节阀 SDA-3 sector air volume control switch >>

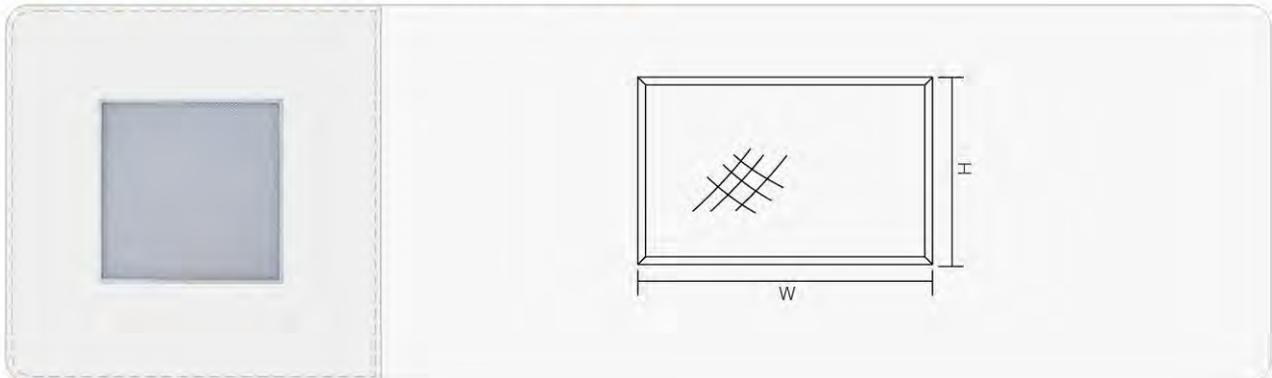

- **材质:** 镀锌钢板
- **特性:** 叶片呈扇形分布, 具有整流风量, 使风均匀的效果。
- **规格尺寸:** $\Phi 150$ $\Phi 200$
 $\Phi 250$ $\Phi 300$
 $\Phi 350$ $\Phi 400$
- **Material:** Galvanized steel plate
- **Features:**
 - The leaf is distributed like a fan and it has such effect as air rectification and uniform air supply.
- **Specification:** $\Phi 150$ $\Phi 200$
 $\Phi 250$ $\Phi 300$
 $\Phi 350$ $\Phi 400$

SDA-4尼龙过滤网 SDA-4 nylon filter >>

- **材质:** 尼龙过滤网
- **规格尺寸:** W×H配合风管或风口尺寸
- **特性:** 采用Φ5圆钢作衬框, 将尼龙锦凸网包上绷紧即可, 也可外包铝合金外框。
- **Material:** Nylon wool convex mesh
- **Specification:** W×H to fit for the size of air pipe or air outlet.
- **Features:**
Use φ 5 round steel as inner frame and packed with nylon wool convex mesh tightly for packed with aluminium alloy outer frame.

SDA-5铝合金过滤网 SDA-5 aluminum alloy filter >>

- **材质:** 铝板网
- **规格尺寸:** W×H配合风管或风口尺寸
- **特性:** 采用2~3种不同厚度及密度的铝板网、加工成波纹状纵横交叉叠合而成, 外包铝合金外框。
- **Material:** Aluminum expanded sheets
- **Features:**
Use 2-3 kinds of aluminum expanded sheets with different thickness and density to be corrugated intercross and packed with aluminum alloy outer frame.
- **Specification:** W × H to fit for the size of air pipe or air outlet.
